

LUCKY WIN BACCARAT

Lucky Win Baccarat

Now Baccarat has a clear choice for a true Baccarat-on-Baccarat Side Bet and Progressive!

Lucky Win Baccarat is a side bet for traditional or *commission-free baccarat*, where the Lucky Win side bet pays on a winning hand of 5 or less. These are hands that a player would normally expect to lose. The player may select either the Banker's side or the Player's side to get a Lucky Win and will win according to a graduated payable. The base Baccarat game is not affected in any way.

Unlike other Baccarat side bets, Lucky Win Baccarat does not rely on non-Baccarat "events" to create a baccarat side bet such as a pre-determined three-card outcome or a pre-determined winning spread. Winning Lucky Win wagers are hands that occur naturally and frequently throughout the course of the game. All Lucky Win hands occur during the 3rd card draw which create a more dramatic and thrilling experience because the outcome is unknown after the initial draw.
